

AQUA *Blu*

POWERED BY KINETICO

Welcome to AquaBlu

AquaBlu is a mid-range water softener, ideally suited for houses with one bathroom and a standard combi or gravity fed heating system.

- Perfect for people looking for a good value introduction to water softeners, or those wanting to upgrade from a basic budget electric softener.
- The AquaBlu is a non-electric water softener which uses tried and tested Kinetico technology.
- The twin-tank design is the only system to provide a continuous flow of soft water 24 hours a day, 7 days a week.
- The AquaBlu is a compact softener and will fit neatly and easily under a kitchen sink.
- This reliable appliance comes with a 2 year parts warranty as standard.

Specification

Specification:

Dimensions	495mm (h) x 205mm (w) x 475mm (d)
Inlet/Outlet Connections	3/4" BSP (male)
Salt Capacity	2 x 4 kg (Kinetico block or tablet salt)
Max. Temp.	35°C
Min./Max. Inlet Pressure	8.3 bar
Min. Outlet Pressure	1.0 bar
Min. Flow, l/m	0.6
Flow Range	Service 20 1 bar ΔP* Peak 31 2 bar ΔP*

Regeneration:

Salt Consumption	0.45 kg
Time (min.)	12
Volume (litre)	23

Disc Selection

	PPM**	L
1	0 - 92	2206
2	93 - 181	1103
3	182 - 269	734
4	270 - 356	548
5	357 - 442	439
6	443 - 524	367
7	525 - 607	314

*ΔP = Pressure drop ** PPM = Parts per million

Overview

Over 40 years experience

The AquaBlu is powered by renowned Kinetico water softener technology.

Non-electric

The AquaBlu is powered by the kinetic energy of moving water.

Twin-tank design

Kinetico's twin-tank design ensures a continuous and uninterrupted supply of soft water.

Metered regeneration

The AquaBlu softener only regenerates when necessary.

Soft water rinse

Only softened water is used during the self cleaning process.

Countercurrent regeneration

The AquaBlu regenerates from the bottom up, meaning less waste, less salt and a longer lasting softener.
